

Leonardo Da Vinci

The Greats of STEM

Leonardo da Vinci is well known for his many works:

Amongst his many sketches, were a number of different bridge designs, many too advanced for the technology of his day:

"The emergency bridge"

This bridge design was likely sketched sometime between 1485 and 1490, and shows a bridge that could be used by military forces, put across an obstacle relatively easily and rapidly, and is self-supported.
